

 DESERT
STEEL

ABOUT US

When you can't grow it you make it!

Born from the artistic talents of Kansas natives Eric Carroll and his father-in-law Richard Turner.

Desert Steel started as a hobby to see if the beauty of nature could be replicated in a steel form. Could art be durable enough to last a lifetime in any climate yet natural enough no one would know it's steel not real.

Zero maintenance landscaping reimaged with a passion for nature and an incredible gift to make flat sheet steel come alive. Landscape with natural beauty and a certainty you won't find anywhere else.
